***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3-4, 6-9, 11-13, 15, 17, 19-20, 22-25, 27-29, and 31, are rejected under 35 U.S.C. 102(e) as being anticipated by Mercier as set forth in the previous Office Action mailed out on 9/23/05.
3. Claims 2, 5, 10, 14, 18, 21, 26, and 30, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

4. Applicant's arguments filed 12/20/05 have been fully considered but they are not persuasive.

Regarding the Applicant's argument in that the cited reference of Mercier fails to disclose the feature of selectively repeating at least one original picture to convert the video signal to a trick mode video signal as claimed, Examiner disagrees. It is noted that such a feature of repeating one original picture to convert the video signal to a trick mode video signal would be an inherently characteristic of Mercier's apparatus. Because, Mercier discloses that the empty picture that is inserted in the trick mode

video signal has the characteristic of a reference picture (original picture). (See Mercier's column 10, lines 25-28, and column 2, lines 59-63). Applicant's attention is further directed to Mercier's Figure 13, wherein original pictures are repeated in creating the trick mode video data.

Regarding the Applicant's argument in that Mercier fails to disclose the feature of inserting at least one dummy predictive picture in the video signal to form a trick mode video signal, Examiner disagrees. It is noted that such a feature of inserting at least one dummy predictive picture in the video signal to form a trick mode video signal argued by Applicant is clearly present in Mercier. Applicant's attention is directed to Mercier's Figure 13, and column 2, lines 59-63.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
